

Power Platform User Group Denmark

Community møde
18. September 2026

Ny hjemme side på <https://www.ppug.dk>

Næste online møde:

23. Oktober 2026 kl. 13-14

Ny kontrakt: boejstrup@msn.com eller mab@jndata.dk

Power Platform: Information about SharePoint file thumbnail changes

Thumbnail URLs in SharePoint triggers/actions will be replaced by the new "Get file" thumbnail action, which provides an image instead of a URL.

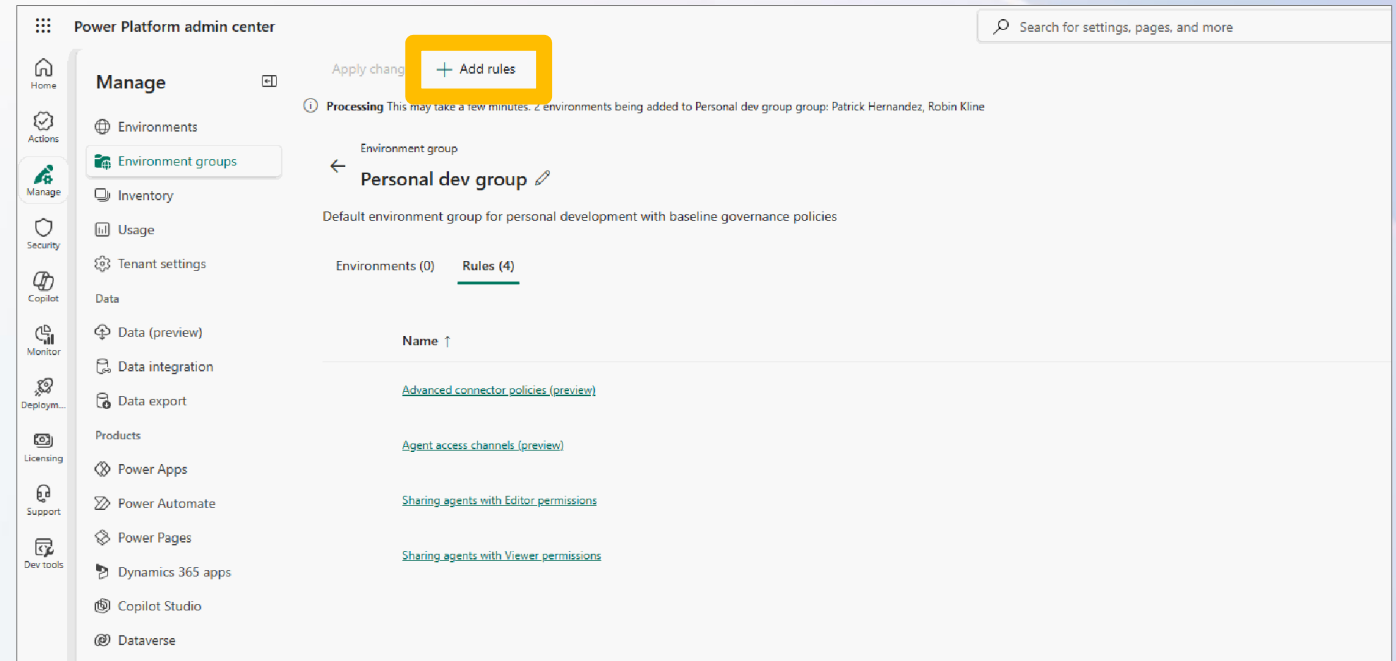

Update affected flows to use the new "Get file" thumbnail action to avoid failures in subsequent actions.

Power Platform: Environment Group Rules Gallery

Microsoft is introducing the **Environment Group Rules Gallery** in the Power Platform admin center to **streamline governance across multiple environments** via a centralized, browsable catalog of pre-built rules.

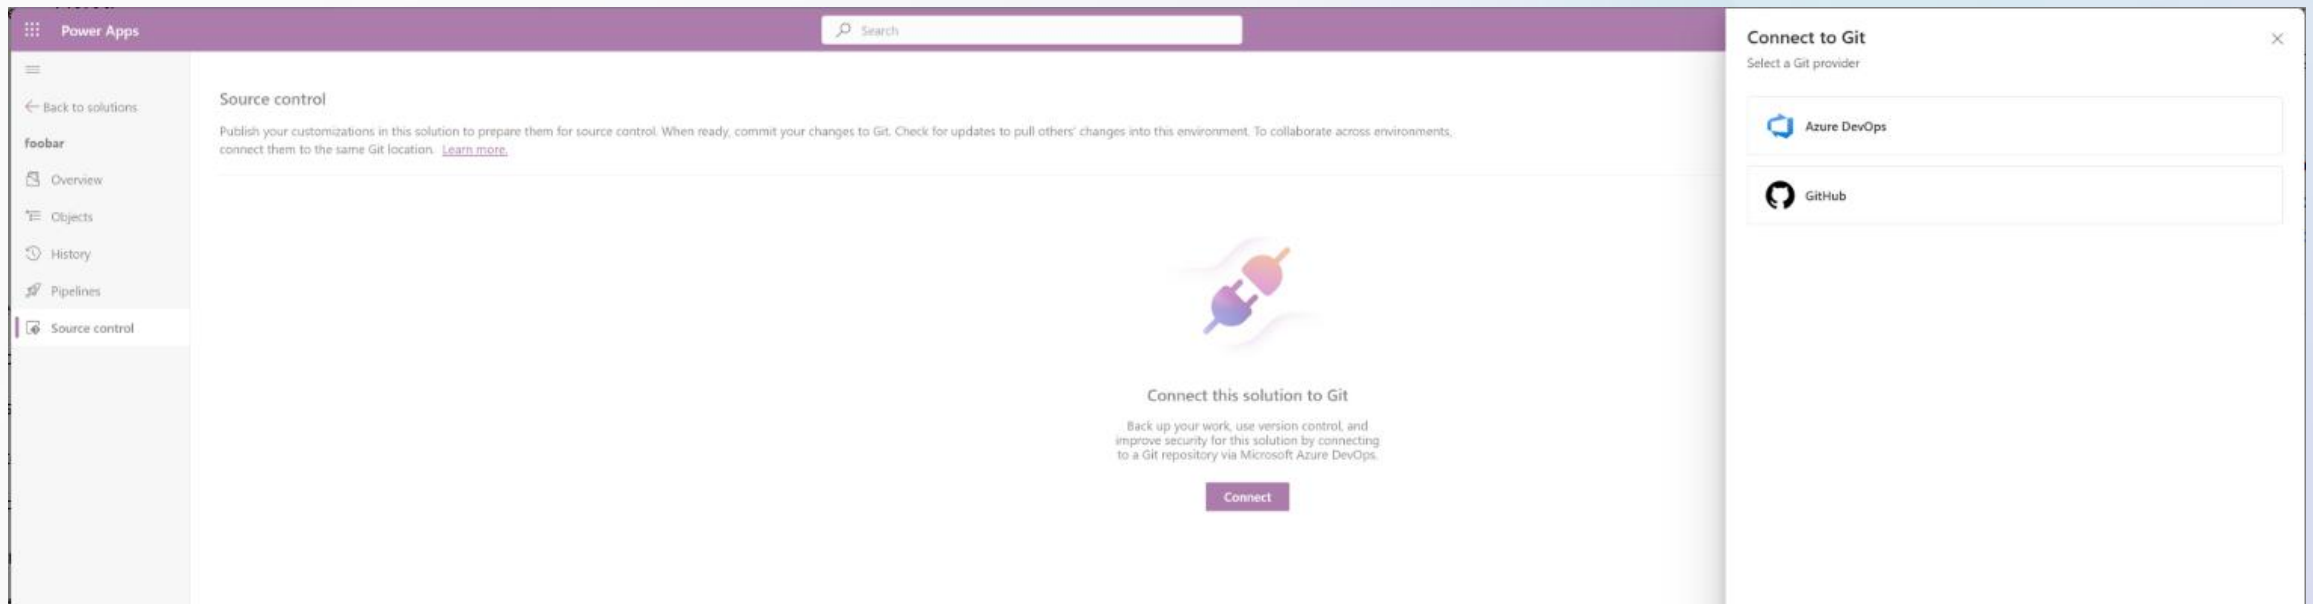

Power Platform: GitHub support for source code integration in Power Platform (preview)

GitHub is now supported for source code integration in Power Platform, alongside Azure DevOps, with enhancements to performance, reliability, and public APIs.

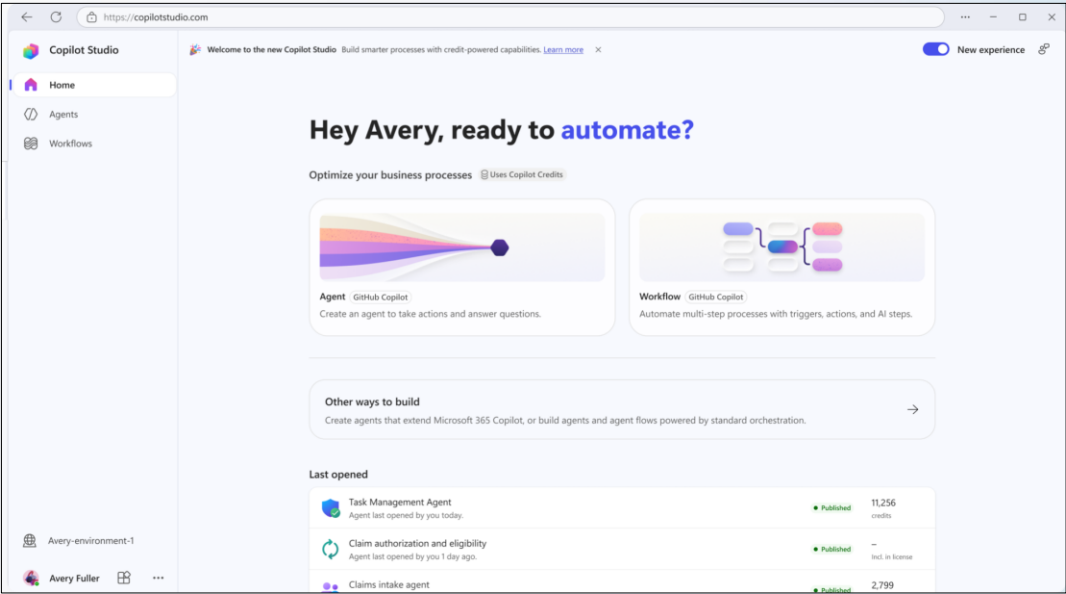

Note : Connecting to Git will turn on **Managed Environments** for the environment.

Microsoft Copilot Studio: GitHub Copilot harness now generally available for building autonomous agents and workflows

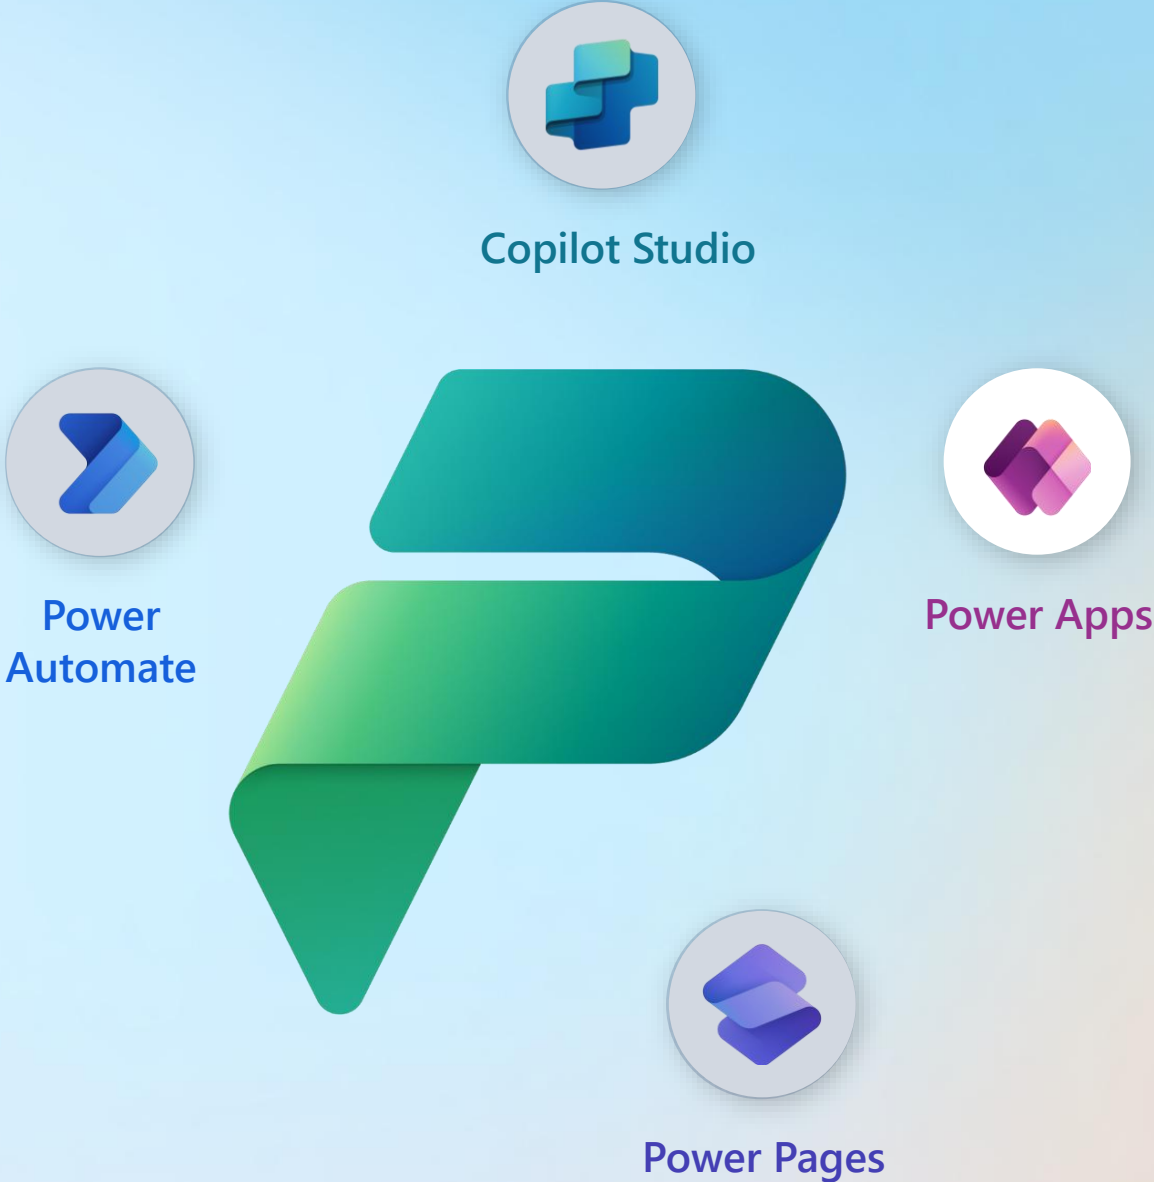

Microsoft Copilot Studio now supports the GitHub Copilot harness, enabling advanced reasoning, workflow orchestration, and agent creation with a usage-based billing model.

Review potential costs using the Power Platform admin center and assess scenarios for adopting advanced capabilities.

GitHub Copilot harness in Copilot Studio

Power Apps

Power Apps: Multi Select in Grid column filtering (Preview)

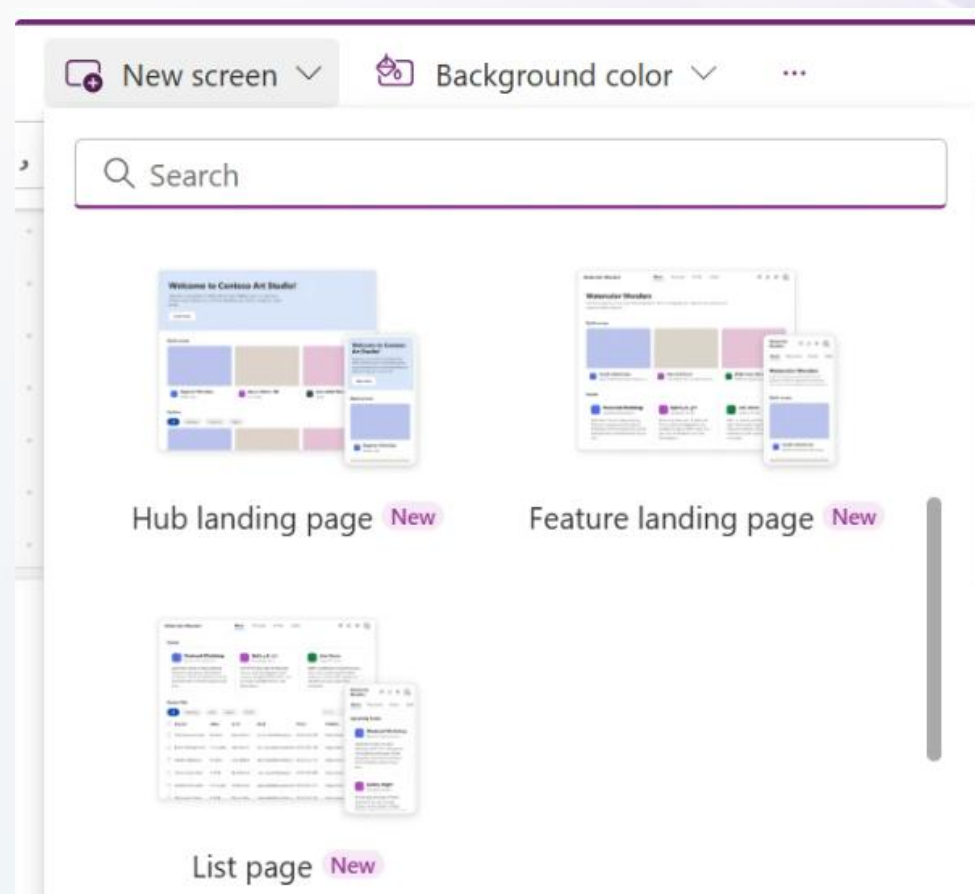

Microsoft is introducing the ability to **filter grid columns using fields with multiple selected values** in model-driven Power Apps.

☐	Asset ID	Title	Available	Link to item

Power Apps: New fluent 2 app templates

Makers now have new fluent 2-based templates that provide a ready-to-use, professionally designed starting point for canvas apps — built on modern controls and fluent patterns instead of a blank screen

Power Pages

Power Pages: Create and delete websites using Power Platform CLI

The Power Platform CLI now supports **commands for creating and deleting Power Pages sites**, enabling streamlined developer workflows and CI/CD automation.
